

[TECHNICAL DETAILS]

File Naming Conventions:

FULL - Files with FULL in the name are the full version of the track, the intro and main sections all combined and placed in the intended order.

Intro - This is the intro segment of a track that is only intended to be played once and excluded from the looping main sections

Main Sections - This is the combined looping section of the track and contains all of the sections (A,B,C, etc.)

Section A, B, C, etc. - A track that contains these segments means that the order in which the sections play can be varied. For example: Instead of the regular A, B, C, order, the track can be pieced together to play in a different order like B, A, C.

All Instruments - Tracks with this in the title are the versions that contain all of the instruments (orchestra, percussion, and synths all combined)

Orchestra Only - Tracks with this title are the versions that contain only the live orchestra (no synths and percussion). This can allow you to program the percussion and synths to fade in at more intense sections if you'd like, or if you'd just rather have the orchestra playing by itself instead.

Percussion and Synths Only - These tracks contain only the percussion and synth stems without the orchestra parts

Track Tempo & Time Signature:

+ **Fortress of Solitude** - 110 bpm | 4/4 Meter

+ **Victory Stinger** - 110 bpm | 4/4 Meter

+ **Defeat Stinger** - 110 bpm | 4/4 Meter
